Cable HANGER

The Claw,
Rated to 30 Kg

The Claw

The new cable hanger from Lidwig takes the clamp invention one step further. Building on the patented clamping power of the X-Series clamps, the Claw Hanger is the workshop hook you will find hundreds of uses for!

*"...another fun gadget from Lidwig. The Claw is labelled to hold extension cords, air hoses and band saw blades, and it does that extremely well. But my first thought was to use this product to hang my 4" dust collection hose. The Claw wraps perfectly around the hose and can be hung anywhere in the shop. As a bonus, the hook is on a swivel, so once piped, you could move from tool to tool with ease. The Claw is available for a *whopping* \$8!" -- Glen from Popular Woodworking Magazine.*

Safety Hook

O.H. & S. requires extension leads are elevated for safety. Use to hold cables, or clamp upside down as a safety hook (pictured).

Sheer Strength
Rated to 30Kg each!
Combined claws to store heavy items, anywhere

Easy to Use!

Step 1

Open the jaws and place over the cable (or hose, or pipe, or ... whatever!)

Step 2

Close the jaws to engage the teeth at the bottom. Hang anywhere using the swivel hook at the top.
